The SculpSure device is a non-invasive laser body contouring system, intended to permanently eliminate fat cells through non-invasive lipolysis of the abdomen, love handles (flanks), back, inner and outer thighs, and under the chin (submental). Individual results may vary and are not guaranteed. SculpSure treatments are not intended for weight-loss results or for people who are obese. Mild side effects may occur, including temporary tenderness, swelling, or tissue firmness in the treatment area. Please consult with your physician to see if SculpSure treatments are right for you. Model for illustrative purposes and not an actual patient.
